

Shiba community

Mr Shytoshi Kusama

Mr Shytoshi from Japan Decided to Burn Shib for shiberians.
He decided to acquire and adopt maximum volume of shib tokens from market and providing bonus to Shib dipositors and Refferals.
On every transaction there 10% Shib will burn in future because of that Shib quantity will reduced and get multiple times growth forever to its basic community.

Today, more than ever, we see the need for a truly decentralized L2 network that powers the projects of a large, global, decentralized community.

As is now on display for the world to see, for too long, Shibarians have been subject to outdated systems and methods of control that harm Shibkind. Luckily, Shibarium is the opportunity to change that and today we take another step in the direction of freedom and a righteous planet. How you ask? Well, today we begin the EARLY Beta Test of the Shibarium Network which we call PUPPYNET! As we've mentioned many times, Shibarium is a layer 2 blockchain that allows anyone to build DAPPS, integrate into IRL businesses, and power projects with it. It is low cost, burns Shib in the process, and is being adjusted as the beta test continues over the next few months.

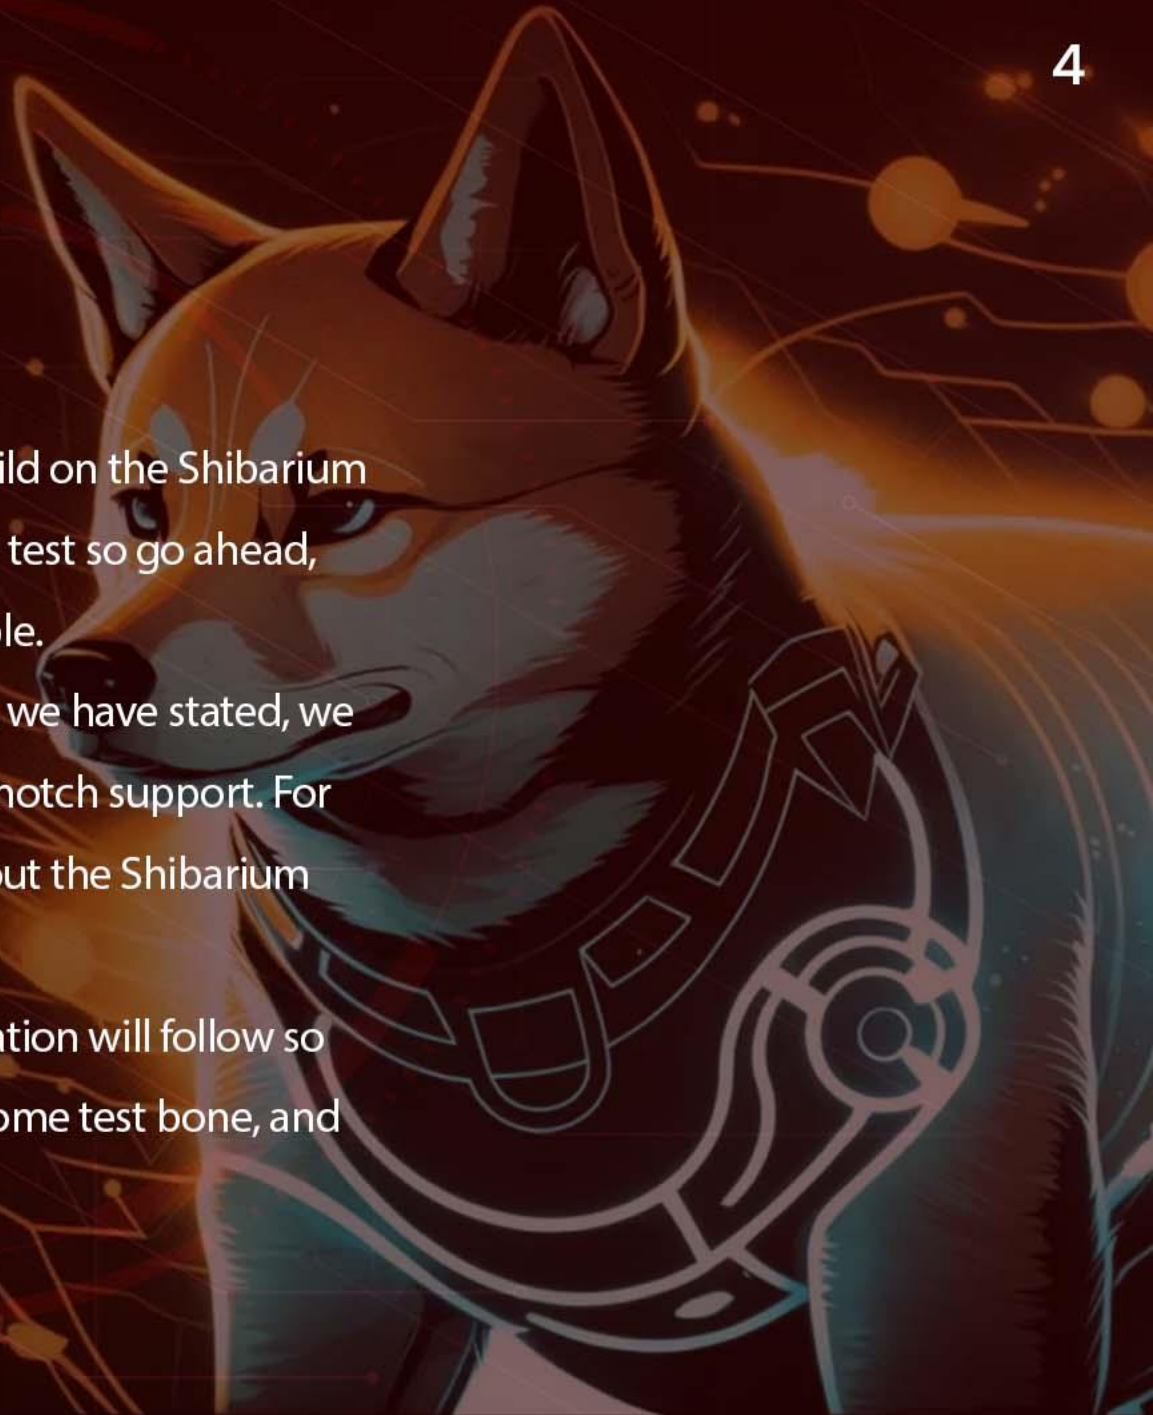

Shibarium Network

Shibarium is only limited by the imagination as anyone can build on the Shibarium Network. In fact, for the TLDR people, this is an open early beta test so go ahead, you can access it now! Shibarium official RPC website is available.

Now, although anyone can build on the Shibarium Network as we have stated, we understand that some prefer a red carpet experience and top-notch support. For those individuals, businesses, and projects, we suggest filling out the Shibarium Technology intake form.

For those who wish to be Validators, next week the documentation will follow so you can set up a test node. For all other devs, go ahead, grab some test bone, and give it a go!

Shibarium Network

1. Shib burns will depend on the txns in the network. To keep track, we will have a running chart for burnt Shib on the burn portal. This is part of the beta testing for Shibarium Network.
2. All tokens on PUPPYNET are NOT REAL. Don't spend you're hard earned SHIBS on these tokens if you see them no matter how hard people, anyone, shills.
3. DYOR, even now! There are many tokens and projects that are being set up by less than perfect personalities and many will not survive. DYOR before doing anything, and watch for those who carry the Shib banner, but speak of other projects. (Why not JUST carry your own banner? Let this be the first step in your own research.)
4. Over the beta it'll become more apparent the difference between the two, but they work in tandem to give an outstanding experience to the Shibarians.
5. For those who already filled out the Shibarium Technology intake form.

Welcome to Shibarium Network

Shibarium was first proposed by Ryoshi, the creator of Shiba Inu as a blockchain, Layer-2 solution. Ryoshi believed that to achieve true decentralization, a community must have its own low cost blockchain solution. For this reason, Shibarium was presented as one of the primary goals of the Shiba Inu experiment as it, theoretically, would reduce transaction fees for those involved in the Shiba ecosystem. Ryoshi initially stated that Shibarium's transaction fees would be minimal, if not zero. "Shibarium will offer low fees for every service, game, or application built on it," explained the Shiba Project Lead, who goes by the name Shytoshi Kusama. "Seconds for less than pennies," is the goal turnaround time for transactions. Although one of the most secure blockchains in existence, Ethereum faces a number of challenges, including high gas fees. The Shiboshi NFTs were affected by heavy gas prices as Shiba relied heavily on the Ethereum network so most transactions on BSC Scan. In the same vein as other projects, Shibarium the Layer-2 solution will also feature a simple and effective \$SHIB burning mechanism. Moreover, Shibarium is designed to facilitate it and may also serve as a bridge between different ecosystems. Continue reading to see how BONE as the primary gas token for Shibarium continues to evolve the Shiba Inu Ecosystem! This document is subject to change. Information may vary in the coming weeks or months as Shibarium is in its Testnet phase.

SHIBARIUM and Shib : SHIB THE METAVERSE

SHIB THE METAVERSE

Ready to discover the future of entertainment, business, and gaming all rolled into one?

Join Shib The Metaverse and see how you can build an experience for your customers, a mirror of your In-Real-Life business, an entire game, structures, furniture and so much more! We are excited to have you as part of our virtual community and can't wait to explore our new digital universe together.

SHIB Price Live Data

The live Shiba Inu price today is \$0.000008 USD with a 24-hour trading volume of \$166,125,287 USD. We update our SHIB to USD price in real-time. Shiba Inu is up 0.39% in the last 24 hours. The current CoinMarketCap ranking is #17, with a live market cap of \$4,688,988,521 USD. It has a circulating supply of 589,348,651,849,585 SHIB coins and the max. supply is not available.

Shiba Token Available On :

Package	Daily Reward
20 to 250 \$	0.15% 1800 days
300 to 1000 \$	0.25% 1800 days
1050 to 5000 \$	0.30% 1800 days
5050 to 10000 \$	0.40% 1800 days

Note- This Community activated for only Shib burning so For activation only Shib token will accepted.

Withdrawal Cycle

All withdrawal will auto calculate every Day.

Withdrawal will credit every Next day.

Gas fee deduction 5% Busd on every transaction.

Min withdrawal 20 Busd Max withdrawal 1000 Busd Per day .

Join the Burn Platform and Earn Highest Rewards...

Shiba Inu's rate of token burns has skyrocketed nearly 8,000% as the SHIB community welcomes yet another listing from a major cryptoexchange. According to Shibburn, which keeps track of SHIB burning, the burn rate suddenly exploded 7,900% & as 43 million tokens can be burned in a single day.

"SHIB UPDATE

SHIB Price: Will reduce 2 Zeros soon | Market Cap: \$6,699,607,943 (-5.47%)

Total Supply: 589,614,707,812,657 | TOKENS can be BURNT in 24Hrs to 7 Days: 148,357,592 (-19.8%)

Upto 2025 over 410 trillion SHIB tokens can be burned from the supply forever, or sent to a dead Ethereum address where they cannot be retrieved. The Shiba Inu community began burning tokens by adapting Burning community by Japan's Community when rival's burn mechanism.
